**Kardia and TomTec Team to Deliver World-class Cardiovascular Imaging and Reporting as Affordable Software-as-a-Service to the U.S. Market**

**MINNEAPOLIS**, (March 15, 2010) Kardia Health Systems (Kardia) and TomTec Imaging Systems (TomTec) today announced a new partnership to deliver TomTec's multi-modality cardiovascular image analysis technology as a part of Kardia Complete™, Kardia's forthcoming Web-based service to simplify workflow and save time in cardiology practices.

Kardia Complete extends structured reporting and workflow technology by providing cardiologists convenient and remote management capabilities of patient images and records, allowing them to work anytime from anywhere. With TomTec technology, cardiologists will be able to review diagnostic images with the same accuracy and tools available on popular cardiovascular imaging devices.

"TomTec is a recognized innovator worldwide in the field of diagnostic medical imaging," said Doug Marinaro, president of Kardia Health Systems. "Through our integration of TomTec technology with the Kardia Complete software service, physicians in small and mid-sized practices will be able to affordably access an expanding array of cardiovascular clinical image analysis and archiving applications."

"TomTec is pleased to be an inaugural partner for the Kardia Complete platform," said Frank Schlau, chief marketing officer at TomTec. "Combining TomTec's unmatched clinical and research oriented analysis tools with Kardia's state of the art IT expertise creates solutions for economical and improved clinical outcomes."

Kardia Complete will combine image viewing, structured reporting and archiving into one seamless solution for small and mid-sized cardiology practices.

Kardia Complete will be available in Q3 2010 in the U.S. market on a modest fee-per-study pricing plan that is more cost effective than purchasing and managing a dedicated system over the legal life of a study. With this economical fee-per-study pricing, practices can avoid large upfront investments, annual support fees, data storage costs and periodic system upgrade charges. To learn more about Kardia Complete visit [www.KardiaHealth.com](http://www.KardiaHealth.com).

**About TomTec**

TomTec Imaging Systems GmbH, with headquarters located in Munich Germany, holds an inventive leadership position in the field of diagnostic medical imaging applications and Cardio PACS solutions. The company maintains close working relationships with many leading universities and device manufacturers around the world. TomTec's product portfolio encompasses a wide range of 2D and 3D/4D technologies for visualization, analysis, reporting and archiving of multimodality imaging data. TomTec solutions are applicable in the fields of Adult- and Pediatric Cardiology as well as Obstetrics, Gynecology, Radiology, and Vascular Imaging. Visit TomTec's web site at [www.tomtec.de](http://www.tomtec.de).

**About Kardia Health Systems, Inc.**

Kardia Health Systems is a health care information technology firm dedicated to applying the best technology from leading institutions to improve patient care, enhance collaboration, and help cardiologists

find more time in every day. Kardia's software and services eliminate needless complexity, reduce cost, and increase the efficiency of cardiovascular disease diagnosis and treatment. Using Internet technology and a Software-as-a-Service (SaaS) business model, Kardia makes world-class, expert technology affordable and relevant to the needs of practices of all sizes.
